

# iSchool Illini Success 2018-2019

## Master's in Information Management First Destination Report

The report includes students who graduated during the 2018-2019 academic year. The data came from several verifiable sources. The vast majority of data came from the campus-wide survey, which invited graduates to provide information about their post-graduation status at regular intervals for six months following their graduation. In addition to the survey, data were also gathered from college reports and a limited use of graduates' LinkedIn profiles. The graduating class consisted of master's students in the Information Management program.

Please note, the salaries listed below are greatly influenced by profession, previous educational backgrounds, and previous pre-professional and professional experience.

### Primary Status, 2018-2019

96 Graduates Responding
